

Sarah Jenkins

Seattle, WA • sarah.jenkins.mock@email.com • linkedin.com/in/sarahjenkins-mock

Education

Master of Science in Computer Science

Expected Dec 2026

City University of Seattle, Seattle, WA

Bachelor of Science in Computer Science

June 2023

University of Washington, Seattle, WA

Technical Skills

Languages: Python, Bash, SQL

MLOps & Tools: MLflow, Docker, Kubernetes, GitHub Actions, Terraform, Azure ML

Concepts: CI/CD, Model Monitoring, Automated Pipeline Architecture

Projects & Experience

Automated ML Pipeline Architecture (AI 510)

Spring 2026

- Designed an end-to-end machine learning pipeline using MLflow and GitHub Actions to streamline deployment.
- Focused on the big picture of model lifecycle management, successfully reducing deployment time by 40%.
- Implemented robust model monitoring to detect data drift and automate retraining triggers.

Infrastructure as Code (IaC) Implementation

Fall 2025

- Utilized Terraform to provision scalable cloud environments for machine learning models.
- Ensured zero downtime during system updates by utilizing blue-green deployment strategies.

Data Engineering Intern

Summer 2023

TechSolutions Inc., Bellevue, WA

- Developed ETL scripts using Python to migrate legacy databases to AWS Redshift.
- Collaborated with data scientists to optimize query performance, reducing report generation time by 25%.
